DETAILED ACTION

Re: Schlom et al

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/23/2007 has been entered.

The amendment filed 4/23/2007 is acknowledged and entered into the record.

Accordingly, claims 1-16,18-19,21,23-24,32-33, and 35 are canceled without prejudice or disclaimer, and claims 37-42 are newly added.

Claims 17,20,22,25-31,34, and 36-42 are pending and examined on the merits.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections Maintained - 35 USC § 102

The rejection of claims 17,25-26, 28 and now claims 37-42 under 35 USC § 102(e) as being anticipated by Spitler *et al* (US Patent 5,925,362) is maintained for the reasons of record. Applicant argues that the recited reference does not anticipate the instantly claimed invention because the inventors work pre-dates the earliest possible filing date of Spitler *et al* (i.e. 8/11/1993). Applicant also points to the declaration filed

Application/Control Number: 09/693,121

Art Unit: 1643

under 37 CFR § 1.131 by the inventors Jeffery Schlom and Dennis Panicali on 12/01/2005 (see specifically page 2 paragraph 5) which indicates that the inventors work was accomplished prior the earliest effective filing date of the instant invention. Applicant's arguments have been carefully considered but are not deemed persuasive to overcome the rejection of record.

The declaration filed under 37 CFR 1.131 on 12/01/2005 under 37 CFR 1.131 has been considered but is ineffective to overcome the Spitler *et al* reference. The evidence submitted is insufficient to establish a conception of the invention prior to the effective date of the Spittler *et al* reference. While conception is the mental part of the inventive act, it must be capable of proof, such as by demonstrative evidence or by a complete disclosure to another. Conception is more than a vague idea of how to solve a problem. The requisite means themselves and their interaction must also be comprehended. See *Mergenthaler v. Scudder*, 1897 C.D. 724, 81 O.G. 1417 (D.C. Cir. 1897). In the instant case, the claims of the instant invention are drawn to a method of generating a cytotoxic T-cell response to PSA comprising the administration of first pox virus vector encoding a PSA antigen or a T-cell eliciting epitope thereof and subsequently administering an additional dose of the PSA antigen or T-cell eliciting epitope thereof.

The declaration presented on 12/1/2005 details the generation of a vaccinia virus expressing PSA (see exhibit "A" of the declaration) as well as brief outline which utilizes the vaccinia virus expressing the PSA. This declaration, however, is not commensurate in scope to the claimed invention. First, the declaration does not provide for any

Application/Control Number: 09/693,121

Art Unit: 1643

indication or conception of multiple administrations of the vector expressing the PSA antigen of the T-cell eliciting epitope thereof. Secondly, the evidence provided to support the assertions that the invention was conceived prior to 8/11/2003 include constructions of the vector expressing the PSA (see exhibit "A") and brief outlines of using the vector, including "Generation and analysis of virus stock", "Product Manufacture", "Testing/Final reports", and "Master File Preparation". None of the evidence provided, details the conception of administering the PSA encoding pox viral vectors or a method of multiple administrations of pox viral vectors encoding PSA T-cell eliciting epitopes as claimed. The declaration appears to document the production of vectors comprising the gene encoding PSA. As such, the declaration is not commensurate in scope to the claimed invention.

Therefore, the rejection of claims under 35 USC 102(e) as being anticipated is maintained for the reasons of record.

Claim Rejections Maintained - 35 USC § 103

The rejection of claims 17,20,22,25-31,34-36, and now newly added claims 37-42 under 35 USC § 103(a) as being obvious over Spitler *et al* in view of Fields and Hodge *et al* is maintained for the reasons of record. Applicant's arguments are substantially similar to those presented for the 102(e) rejection above. Therefore, applicant's arguments have been carefully considered and are not deemed persuasive to overcome the rejection of record. The rejection of the claims under 35 USC 103(a) is maintained for the reasons of record.

NEW CLAIM OBJECTIONS

Claims 17 and its dependents are objected to because of the following informalities: claim 17 recites in line 8 the phrase "and then administering the first pox virus vector". The claim is unclear because the method already recited an administration of a "first pox virus vector" in line 3 of claim 17. Appropriate correction and or clarification is required.

Conclusion

No claim is allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher H. Yaen whose telephone number is 571-272-0838. The examiner can normally be reached on Monday-Friday 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Larry Helms, Ph.D. can be reached on 571-272-0832. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
